Re: Response to Correspondence dated March 13, 2020 for the Fall 2019 Semi-Annual
Groundwater Monitoring Report
Delavan Spray Technologies Site
Bamberg, South Carolina
SCDHEC VCC Number 13-4762-RP
SCDHEC File Number 51778

Dear Ms. Devlin:

On behalf of Delavan Spray Technologies, AECOM is providing this response to your March 13, 2020 letter to Ms. Melinda Washington. The correspondence includes the following request:

As discussed in the February 25, 2020 meeting between the Department and Delavan, water samples from the unnamed tributary to Lemon Creek should be analyzed to determine if groundwater contamination is discharging to surface water. A letter plan to sample and analyze surface water should be submitted on or before April 17, 2020.

As discussed in the February 25, 2020 meeting, the creeks are difficult to access at many locations along their lengths. We propose to collect surface water samples at creek intersections with roadways and utility right-of-ways for accessibility. The following proposed locations are shown on attached Figure 1:

- The Tributary to Lemon Creek along the power line right-of-way;
- Halfmoon Branch at the crossing with US Highway 301;
- Lemon Creek at the crossing with US Highway 301; and
- Lemon Creek at the crossing with US Highway 601.

These locations will be sampled for volatile organic compounds (VOCs) by USEPA Method 8260B. Samples will be collected using a peristaltic pump and the "soda straw method". The samples will be collected during the next semi-annual groundwater monitoring event, which is currently scheduled for the week of April 13, 2020.

Ms. Cynde Devlin
