Re: Goodrich Delavan Spray Technology Site
Limestone Aquifer Groundwater Assessment Work Plan dated October 13, 2017
Telephone conversation (Walker, Penn and Gerald, 12/15/17)
Bamberg County
VCC #13-4762-RP
File #51778 (Former Site ID #02211)

Dear Ms. Coombs:

The Department has reviewed the referenced work plan and offers the following comment. The referenced plan proposes temporary borings along Lemon Creek Road (which is 3/4 mile downgradient from the most recent groundwater samples) and not nearer to the last samples due to accessibility issues. However, the residents along Lemon Creek Road are using private wells for a drinking water source and the Department recommends sampling the drinking water wells prior to performing the screening work.

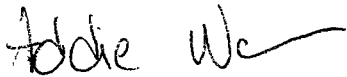

Per the referenced telephone call, the tentative schedule for the sampling activities is as follows:

- On Monday, December 18, 2017, the access agreements and cover letters will be finalized by UTC
- On Tuesday, December 19, the writer and Chuck Suddeth from AECOM will go door to door and attempt to obtain access for UTC to sample the private wells
- On Wednesday, December 20, sampling will be conducted and will continue until all the private wells on Lemon Creek Road and Orangegroove Road for which access has been obtained are sampled

Ms. Coombs
