ePermitting is SCDES's online platform for environmental permitting, licensing, registration, projects, reporting, monitoring, complaints, compliance and enforcement. ePermitting is designed to support the full regulatory lifecycle while allowing you, our customers, to do business with the agency through the platform; among many other features.

Here is a list of some of the system's core functionalities:

- Applications – Account registration, online submittal of applications, and other service requests
- Permitting – New permits and permit revisions, specification of permit conditions, reporting schedules, generation of permit documents
- Compliance Reporting – Online submittal of required or as-needed reports, Discharge Monitoring Reports
- Evaluations – Records review or Inspections, tablet-based inspection forms (nSPECT),
- Enforcement – Formal and Informal actions, specification of compliance reporting schedules, penalties/fines

ePermitting Training

ePermitting Training - Air Quality

ePermitting Training - Asbestos

ePermitting Training - Construction
Stormwater

ePermitting Training - Industrial Stormwater

ePermitting Training - Navigable Waters

ePermitting Training - Private Wells

ePermitting Training - Septic Tanks

ePermitting Training - Tanning

SCDES has developed training to help users with navigating the ePermitting system.

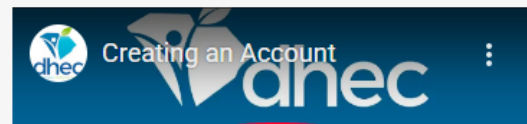

Because the move from the department's previous database is complex, programs will not all move to ePermitting at the same time. As programs move forward with the shift, they will communicate with their impacted users about training, how to access the system, and what to look forward to as users begin to use the new system. If you have any questions, please [contact us](#).

ePermitting is designed to work best using Microsoft Edge or Google Chrome on a personal computer. Users may also find that ePermitting works on tablets, but we do not recommend accessing it on a phone.
