Request for Odor Assessment Plan
Barnwell Resources Class 2 Landfill
Permit # 072410-1201
Beaufort County

Dear Mr. Dean:

Over the past few weeks, the Department has received an increase in the number of odor complaints in the Ladys Island Community near the Barnwell Resources Class 2 Landfill. Department staff have also observed odors associated with hydrogen sulfide in the general area of the landfill. Based on the number of complaints, Department observations, and the Regulatory requirement to effectively control odor (Regulation 61-107.19, Part IV, Section C.10), the Department is requiring you to submit an Odor Assessment Plan. This plan should be submitted no later than October 15, 2025, using the schedule setup in ePermitting.

The Department is also requesting that the facility review its current operational activities to ensure that water is not ponding within the waste disposal area, the top deck is properly sloped to direct runoff away from the working face, stormwater conveyances are properly functioning and directing runoff away from the landfill footprint, the size of the working face is as small as possible, etc. This list is not inclusive and other items may need to be evaluated. As part of the Odor Assessment Plan, please describe any operational activities that have already occurred or that you have identified as needing to occur to help reduce odors in the area.

If you have any questions regarding this approval, please contact me at (803) 898-1339 or justin.koon@des.sc.gov.

Sincerely,

A handwritten signature in blue ink, appearing to read "Justin Koon".
